## **Continuation Sheet (PTO-303)**

Application No.

Continuation of 3. NOTE: The amendments to the claim changes the range of the moisture content (claim 50). These limitations were not present in the finally rejected claims and would add new issues requiring search and consideration.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments over claim 50 have been considered however they are all directed to limitations not being entered for the reasons above and therefore are considered non-persuasive in view of the finally rejected claims. Regarding Applicant's arguments over claim 32, Applicant has argued the same arguments as used per claim 50, namely that Vinden teaches away from using microwave energy to substitutially dried wood. However, Applicant relies upon limitations that are not found within the claim; the phrase "substitutially dried wood" is not found or used in claim 32, nor is the range of less than 15% moisture content (as recited in claim 50) found in claim 32. Thus, Vinden does not teach away from using microwave radiation, as Vinden teaches applying the microwave radiation to wood at 15% moisture content (considered substitutially dry).
